

\* Denotes ground. Voltage reference unless otherwise indicated.  
 --- Indicates connection used in some versions.  
 - - - Indicates connection not used in some versions.  
 \* Denotes in some versions.  
 \* See parts list.  
 Measurements taken with switching in position shown unless otherwise indicated.  
 \* Measured with switching in "AM" position.  
 Values shown in  $\Omega$  are used in some applications.  
 Resistors are 1/2W or less, 10% or 20%, unless otherwise indicated.  
 Supply voltage maintained at rated value for measurements.  
 Voltage and resistance measured with VTM or equivalent meter, no signal applied and controls adjusted for normal operation.  
 Arrow on control indicates direction of advance.  
 Numbers assigned to terminals may not be found on the unit.  
 Transistor resistances vary widely. No resistance measurements taken.
